DIE GUTE REKLAME IST BILLIG.

Ein geringes Maß hochwertiger Reklame, die in jeder Weise Qualität verrät, übersteigt an Wirkung eine vielfache Menge ungeeigneter, ungeschickt organisierter Reklame.
Max Burchartz.

MERZ

11

TYPO

REKLAME

EINIGE THESEN ZUR GESTALTUNG DER REKLAME VON MAX BURCHARTZ:

Die Reklame ist die Handschrift des Unternehmers. Wie die Handschrift ihren Urheber, so verrät die Reklame Art, Kraft und Fähigkeit einer Unternehmung. Das Maß der Leistungsfähigkeit, Qualitätspflege, Solidität, Energie und Großzügigkeit eines Unternehmens spiegelt sich in Sachlichkeit, Klarheit, Form und Umfang seiner Reklame. Hochwertige Qualität der Ware ist erste Bedingung des Erfolges. Die zweite: Geeignete Absatzorganisation; deren unentbehrlicher Faktor ist gute Reklame. Die gute Reklame verwendet moderne Mittel. Wer reist heute in einer Kutsche? Gute Reklame bedient sich neuester zweckmäßiger Erfindungen als neuer Werkzeuge der Mitteilung. Wesentlich ist die Neuartigkeit der Formengebung. Abgeleierte banale Formen der Sprache und künstlerischen Gestaltung müssen vermieden werden.
Zitiert aus Gestaltung der Reklame, Bochum, Bongardstrasse 15.

DIE GUTE REKLAME
ist sachlich, ist klar und knapp, verwendet moderne Mittel, hat Schlagkraft der Form, ist billig.
MAX BURCHARTZ.

tance. Ce qui intéresse un dadaïste, c'est sa propre façon de vivre. Mais ici nous entrons dans le grand secret.

Dada est un état d'esprit. C'est pour cela qu'il se transforme suivant les races et les événements. Dada s'applique à tout, et pourtant il n'est rien, il est le point où le oui et le non et tous les contraires se recontrent non pas solennellement dans les châteaux des philosophies humaines, mais tout simplement aux coins des rues, comme les chiens et les sauterelles.

Dada est inutile comme tout dans la vie.

Dada n'a aucune prétention, comme la vie devrait être.

Peut-être me comprendrez-vous mieux quand je vous dirai que dada est un microbe vierge qui s'introduit avec l'insistance de l'air dans tous les espaces que la raison n'a pu combler de mots ou de conventions.

TRISTAN TZARA.

Versuch einer Anleitung zur Aussprache von W W P B D. Ich wähle die Vokale und Konsonanten der deutschen Aussprache. Konsonanten ohne Vokal sind tonlos. Doppelte Konsonanten sind nicht doppelt zu sprechen. Ein Vokal ist sehr kurz zu sprechen, zwei Vokale lang, nicht doppelt. In P B D ist übrigens alles kurz zu sprechen.

BLUeMnEr: »ANNA Blume, meine 3 Buchstaben zu Dich, bin ich.«

Das Lebensgefühl einer Zeit, nicht die Formtradition, ist Richtlinie für ihre Kunst. So weist die Tendenz der architektonischen Entwicklung nach einer Baukunst, welche im Wesen mehr als früher an das Stoffliche gebunden, in der Erscheinung darüber mehr hinaus sein wird, welche sich frei in der Fülle des Lichtes entwickelt zu einer Reinheit des Verhältnisses, einer Blankheit der Farbe und einer organischen Klarheit der Form.

L'esprit vivifiant d'une époque et non les formes traditionelles forment la direction à son art. C'est ainsi que la tendance du développement architectural nous offre une architecture qui en réalité est plus attachée à la matière qu' autre fois, mais qui en apparence la dépasse de beaucoup. C'est une architecture qui se deploie librement en pleine lumière, en une pureté de proportions, en un éclat de couleurs et une clarté organique de la forme.

J. J. P. OUD.

MIES VAN DER ROHE

Wir kennen keine Form-, sondern nur Bauprobleme. Form ist nicht Ziel, sondern Resultat unserer Arbeit.
Nous ne connaissons pas de problèmes de forme, mais des problèmes de construction. La forme n'est pas le but, mais plutôt le résultat de notre travail.

LA REVOLUTION SURREALISTE
LA REVOLUTION SURREALISTE
LA REVOLUTION SURREALISTE

LA RÉVOLUTION SURRÉALISTE

Directeurs :
Pierre NAVILLE et Benjamin PÉRET
15, Rue du Grenelle
PARIS (7e)

Le surréalisme ne se présente pas comme l'exposition d'une doctrine. Certaines idées qui lui servent actuellement de point d'appui ne permettent en rien de préjuger de son développement ultérieur. Ce premier numéro de la Révolution Surréaliste n'offre donc aucune révélation définitive. Les résultats obtenus par l'écriture automatique, le récit de rêve, par exemple, y sont représentés, mais aucun résultat d'enquêtes, d'expériences ou de travaux n'y est encore consigné : il faut tout attendre de l'avenir.

Nous sommes

Michel Leiris :

1° Je suis mort. Je vois le ciel pourrir comme le cône d'air renversé, dans une salle de spectacle, par les rayons d'un projecteur. Plusieurs globes lumineux, d'une blancheur laiteuse, sont alignés au fond du ciel. De chacun d'eux part une longue tige métallique et l'une d'elle perce ma poitrine de part en part, sans que j'éprouve aucune douleur. J'avance vers les globes de lumière en glissant doucement le long de la tige et je tiens par la main d'autres hommes qui montent comme moi vers le ciel, suivant chacun la raie qui les perce. On n'entend par d'autre bruit que le craquement de l'acier dans nos poitrines.

2° Je perçois si nettement le rapport entre le déplacement rectiligne d'un corps et une palissade perpendiculaire à la direction de ce mouvement, que je pense un cri aigu.

3° J'imagine la rotation de la terre dans l'espace, non d'une façon abstraite et schématique, l'axe des pôles et l'équateur restant tangibles, mais dans sa réalité. Angoisse de la terre.

4° André Masson et moi évoluons dans l'air comme des gymnasiarques.

Une voix nous crie : « Acrobates monstrueux, allez-vous bientôt descendre tous les deux ? » A ces mots, nous nous renversons par-dessus l'horizon et tombons dans un hémisphère convexe.

DESSIN MÉDIANIMIQUE OBTENU PAR Mme FONDRILLON, MÉDIUM DESSINATEUR DANS SA 70e ANNÉE, PARIS, MARS 1960

POURQUOI JE PRENDS LA DIRECTION DE LA RÉVOLUTION SURRÉALISTE

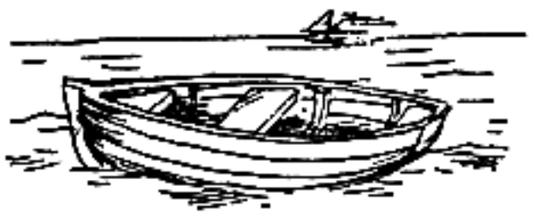
Nous sommes en 1925. Je parle pour ceux qui ont vu la paix s'insinuer, pas mal de gouvernements tenir, pour ceux qui ont vu l'indicible but qu'ils se proposaient s'éloigner, quelques hommes et même quelques femmes faiblir. Leurs yeux ont la couleur de la perte de temps. Ceux-là ont-ils tort de se défier l'un de l'autre, de chercher l'un chez l'autre le point vulnérable ? L'incognito nous souverait tous, mais qu'y faire si tel d'entre nous passe déjà pour un interdit de séjour, et tel pour un roi ? Nous n'avons pas assez fait pour ne point être mis en avant, ou en arrière. L'utilité, la vague utilité dispose de nous ingénieusement. On nous prête un semblant de raison sociale. Artiste, ce mot qui trouve son homme au ministère des Affaires étrangères * tout comme au bas de l'affiche par laquelle s'annonce une tournée de province, ce mot qui ne signifie rien : « Vous êtes artiste ! » Dès lors, quoi que je

* M. Briand.

LES MOTS ET LES IMAGES

Un objet ne tient pas tellement à son nom qu'on ne puisse lui en trouver un autre qui lui convienne mieux

Il y a des objets qui se passent de nom :



Un mot ne sert parfois qu'à se désigner soi-même :

Un objet rencontre son image, un objet rencontre son nom. Il arrive que l'image et le nom de cet objet se rencontrent ·

Parfois le nom d'un objet tient lieu d'une image

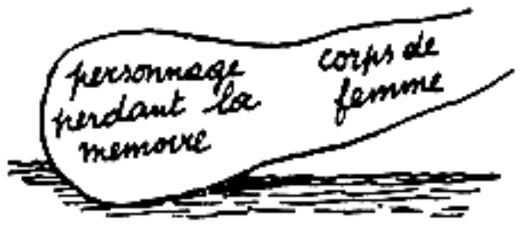
Un mot peut prendre la place d'un objet dans la réalité :

Une image peut prendre la place d'un mot dans une proposition ·

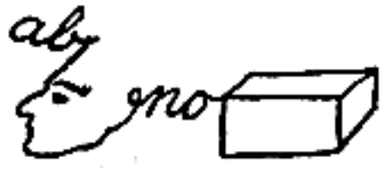
Un objet fait supposer qu'il y en a d'autres derrière lui :

Tout tend à faire penser qu'il y a peu de relation entre un objet et ce qui le représente

Les mots qui servent à désigner deux objets différents ne montrent pas ce qui peut séparer ces objets l'un de l'autre



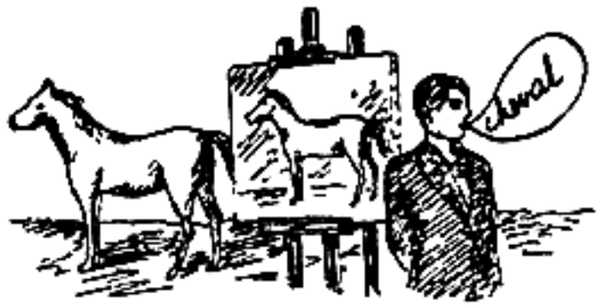
Dans un tableau, les mots sont de la même substance que les images



On voit autrement les images et les mots dans un tableau ·

Une forme quelconque peut remplacer l'image d'un objet

Un objet ne fait jamais le même office que son nom ou que son image



Or, les contours visibles des objets, dans la réalité, se touchent comme s'ils formaient une mosaïque :

Les figures vagues ont une signification aussi nécessaire aussi parfaite que les précises ·

Parfois, les noms écrits dans un tableau désignent des choses précises, et les images des choses vagues ·

Ou bien le contraire :

René Magritte.

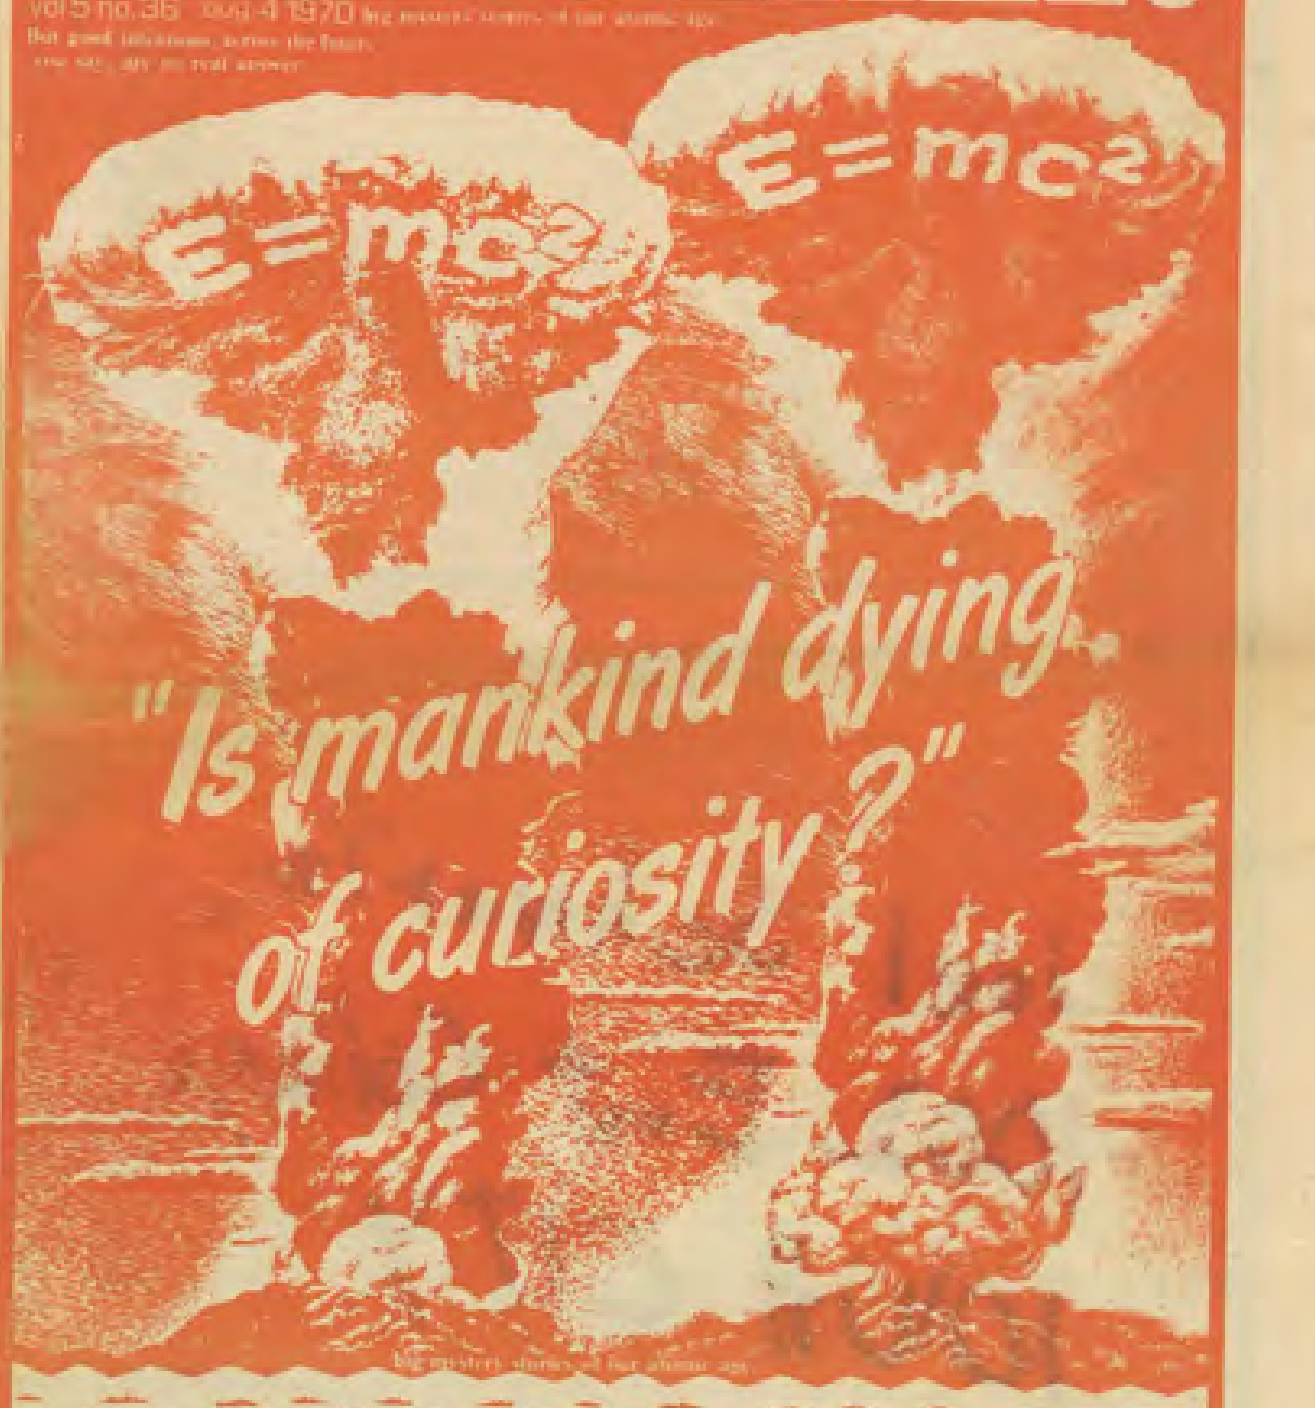
that good tabloidism across the board

the big question and the real answer



big mystery story of the atomic age

The 7-mile tower of atomic death has shadowed New Mexico, Japan, and Bikini. But a darker shadow —four —still lies across the future. For with all the talk about "discovering the secret" of the atom, all that's been done so far is to chip it, not to crack its terrific core. There is no answer to the Big Question—unless it is the sum of everything we can learn about control of the atom (a) as scientists and (b) as responsible citizens.

500 ft. mounds of garbage by 1999. Leaking millions of gallons of toxic waste into our waterways, it is the largest dump on our planet. To replace this overburdened dump will be 5 to 8 incenerators.

By burning garbage, they merely turn land pollution into air pollution. They will emit thousands of tons of toxic pollutants, including dioxin and metal leaden ash.

Alternatives: recycling.

THE WORLD IN WORDS
Plagiarism
THE CRIME OF THE MILLENNIUM!
A SPECIAL REPORT from the Iowa Chapter of the AGGRESSIVE SCHOOL OF CULTURAL WORKERS
THE LINDBERGH BABY
IN LATIN, a plagiarius is a kidnapper, literally one who snares another's child or slave in a plaga (net). Until the late 17th century, the Englishmen was plagiary; only then did it acquire an -ism, suggesting a syndrome or habit rather than an individual perpetrator. And only then did plagiarism come to mean the theft, not of any beloved person or thing, but specifically and exclusively of writing.
REMOVABLE TYPE
BEFORE the invention of movable type in the mid-15th century, when all books were manuscripts, plagiarism, in effect, was necessary. Books multiplied only if they were copied; authors could not afford to be jealous of their words, since unless they got stolen they languished unread. The 20th century, of course,has seen the influx of a large variety of machines that make movable type removable, in the sense that texts and pictures can easily be stolen and reassembled into new constructions. These include, of course, the xerox machine, the tape recorder, home video, and the personal computer, to name a few.
CACHET DOGMA
WELL INTO the 17th century, originality carried no cachet. Shakespeare exemplifies the premodern attitude: he took plots and characters from wherever he pleased, rarely acknowledging sources; and he saw so little sanctity in his own words that anyone could print them who cared to incur the expense—which did not include royalties to Shakespeare. In fact, one might guess that the preeminence of the individual "genius" and the myth of his "mysterious" abilities to "create" stem directly from attitudes developed and passed on by the Modernists.

"It's a depressed, poverty-stricken city. Most of the people don't have jobs. There's nothing to , and no money to do it with," says Wayne Coyne, singer/guitarist, speaking about the band's metown, Oklahoma City.

"There are worse places to live," offers bassist Mike Ivins.

Perhaps it was the "lack of anything else to do" there that inspired the Flaming Lips' initial rmation, and their debut self-titled EP, released on their own Lovely Sorts of Death Records.

Done using Coyne's father's "barter system," they thought they would make the record, and that would "be about it. There was no plan going into it."

Eight years and five albums later, the current incarnation of the Lips, including drummer Steven and guitarist Ron (both of whom dislike their last names), are sitting in the dressing room of the Whiskey A Go-Go in a circle of folding chairs. Tonight's headlining performance will mark their first L.A. gig in support of their major label debut, Hit to Death in the Future Head.

"It doesn't really feel like, 'Welcome to the Corporate World,'" says Coyne in regard to their Warner Bros. signing. "It's just more organized. When they signed us, we never got the idea that they thought, 'Okay, you guys go make the perfect record and sell 10 million copies.' They just want us to make Flaming Lips records. If our next record sounds like we've sold out, it would be because of us."This release did get them their first Parental Advisory label. Even if the only so-called "explicit lyric" on the album is within the grooves of "Felt Good to Burn": "We just slept and fucked and got high."

"I think it was the 'fucked' that did it," he continues. "You can say 'fuck' but you can't mean fucking. It's fine to say 'fuck off.' You just can't mean that unspeakable deed. To me, the label looks stupid in the corner (of the CD jacket). The only argument I heard for it was that someone like Wal-Mart wouldn't carry it. But most people who buy our records don't go in there anyway. They wouldn't carry Nevermind either. Or didn't they put a sticker over his dick?"

"I saw the Guns n' Roses record there," injects Ivins.

"They'll sell anything if they think they can make money off it," says Coyne.

"married an evil woman and lost his desire."

Recorded in two different studios in New York in 1991, Hit to Death was supposed to be released on St. Patrick's Day (March 17, 1992), but Biz Markie fouled up the plan.

"Around Christmas '91, the Biz Markie sampling suit went down," explains Coyne. In it, singer Gilbert O'Sullivan successfully sued the Biz for his blatant sample of "Alone Again Naturally." "That really fucked Warner Brothers up. Anything that had a sample on it had to get approved, and we had used this Michael Kamen Brazil sample. The record had been done for six months, and no one cared until the suit. The sample was from the movie, and movie people don't really care if a record company needs their stuff. So the approval took a long time."

More than a year after its completion, an agreement was reached and the album was released. Produced by the Lips and Dave Fridmann, the album shows that the Lips remain completely unaffected, creating garage-pop-thrash psychedelia with genuine wit and a sense of experimentation. (There's that unlistenable, unlisted 30 minute track...)

Over the years, the Lips have undergone several personnel changes. In the beginning, Coyne's brother, Mark, was the lead vocalist. But he quit shortly after the first EP, and now, "works for Dad. He owns a house. He [illegible] It just wasn't his thing."

by Randy Bookasta

photography by mike bloom

Reduced to a three-piece band, they attracted the attention of L.A.'s independent Restless Records. Three records later, drummer Richard English left. On their fourth album, In a Priest Driven Ambulance, they became a foursome again, adding second guitarist Jonathan Donahue and drummer Nathan Roberts. Both perform on Hit to Death but left prior to the album's release. Donahue now concentrates on his band, Mercury Rev, while Roberts "married an evil woman and lost his desire."

Bassist Ivins has been with the group since day one, despite nearly being electricuted by the gendary bubble machine during a couple of live performances. The current line-up plans on recording soon.

"It's not like we have any other options," says Coyne. "This is what we do. We can't go back to school. There's nothing else t. Either we do this, or we do nothing."

We wander for fulfillment

rAY GUn

Having worked with them several times over the past three years, we knew that any one of the six Mary's Danish could do the interview. Rather than choose, we decided to let the band interview each other. That way, they could do all the work, and we could use the headline, **"Mary's Danish Talks to Themselves."**

What seemed like a good idea, though, didn't exactly pan out.

But that was through no fault of the band, who, as always, were gracious, intelligent and lively.

They started by asking each other about their solo projects, which includes a boys-from-the-band spinoff, drummer James Bradley Jr's. romp through Europe with the Beastie Boys and guitarist Louis Gutierrez's score for David Lynch's television series.

Next they talked about how much they love their new album, *American Standard* and about how it is more focused and cohesive and rocks harder than their others.

And because they are few rock bands with white, black and Hispanic members and are from L.A., they discussed the riots, which went down while they were recording the album at George Lucas' ranch in northern California. That meant they watched their

An Accidental Time Capsule

By Rob Walker

Remember the feeling of finding forgotton photographs in an old shoebox? I just had the similar thrill of revisiting images rescued from an old, dead hard drive — and they turned out to include a fascinating accidental time capsule of late September 2001. A series of signs captured in casual snapshots recall a tentative, transitional moment.

David Maisel and the Apocalyptic Sublime

By Rick Poynor

The aerial photographs in David Maisel's latest book, *Black Maps*, are often deeply disorientating. His pictures are visions of the Earth as we have never seen it and they are scarcely believable at times in their beauty and terror. What is the appropriate response to depictions of brutalized but ravishing landscapes described by the book's contributors as both "seductive" and "repulsive," and as a "topography of open wounds"?

Nation Sets Its Sights on Building Sane Economy

True Cost Tax, Salary Caps, Trust-Busting Top List

By T. VEBLEN

The President has called for swift passage of the Safeguards for a New Economy (S.A.N.E.) bill. The omnibus economic package includes a federal maximum wage, mandatory "True Cost Accounting," a phased withdrawal from complex financial instruments, and other measures intended to improve life for ordinary Americans. (See highlights box on Page A10.) He also repeated earlier calls for passage of the "Ban on Lobbying" bill currently making its way through Congress.

Treasury Secretary Paul Krugman stressed the importance of the bill. "Markets make great servants, terrible leaders, and absurd religions," said Krugman, quoting Paul Hawken, an advocate of corporate responsibility and author of "Blessed Unrest, How the Largest Movement in the World Came into Being and Why No One Saw It Coming."

"At this point, the market is our leader and our religion. No wonder the median standard of living has been declining so much for so long."

Krugman said that the new Treasury bill seeks to ensure the prosperity of all citizens, rather than simply supporting large corporations and the wealthy. "The market is supposed to serve us. Unfortunately, we have ended up serving the market. That's very bad."

Much as Roosevelt, after the Great Depression, put the brakes on C.E.O. wages and irresponsible banking practices, administration officials claim that today we need to rein in the industry that has caused such chaos and misery.

"The building blocks of post-World War II American middle-class prosperity have all been swept away," said House Speaker Nancy Pelosi, who initially op-

IRAQ WAR ENDS

COURTESY ARMY.MIL

U.S. Army helicopters begin moving troops and equipment from Saddam Hussein's former Baghdad palace.

Troops to Return Immediately

By JUDE SHINBIN

WASHINGTON — Operation Iraqi Freedom and Operation Enduring Freedom were brought to an unceremonious close today with a quiet announcement by the Department of Defense that troops would be home within weeks.

"This is the best face we can put on the most unfortunate adventure in modern American history," Defense spokesman Kevin Sites said at a special joint session of Congress. "Today, we can finally enjoy peace — not the peace of the brave, perhaps, but at least peace."

As U.S. and coalition troops withdraw from Iraq and Afghanistan, the United Nations will move in to perform peacekeeping duties and aid in rebuilding. The U.N. will be responsible for keeping the two countries stable; coordinating the rebuilding of hospitals, schools, highways, and other infrastructure; and overseeing upcoming elections.

The Department of the Treasury confirmed that all U.N. dues owed by the U.S. were paid as of this morning, and that moneys previously earmarked for the war would be sent directly to the U.N.'s Iraq Oversight Body.

The president noted that the Iraq War had resulted in the burning of many bridges. "Yet our history with our allies runs deep," he said, "and we all know that friends forgive friends for anything. Or nearly." A spokesperson for the French Ministry of Defense confirmed that France would await the U.S. withdrawal. "The U.S. helped the Soviet Union defeat Hitler. We do recognize that."

In conflict zones worldwide, leaders and rebels pledged peace. (See "In Conflict Zones Worldwide, Peace Moves," on Page A4.)

On Wall Street, reactions were mixed, with the Dow Jones Industrial Average up 84 points, to close at 4,312. While KBR stock was quickly downgraded to a "junk" rating of BBB-, defense contractors such as Lockheed Martin and Northrop Grumman started up.

Maximum Wage Law Succeeds

Salary Caps Will Help Stabilize Economy

By J.K. MALONE

WASHINGTON — After long and often bitter debate, Congress has passed legislation, fiercely fought for by labor and progressive groups, that will limit top salaries to fifteen times the minimum wage. Tying the bill to a plan of overall reform of the U.S. economy, the bill echoes a similar effort enacted by President Franklin Roosevelt in 1942, which was followed by the longest period of growth for the middle class in U.S. history.

"When C.E.O. salaries remain stable thanks to high taxation of high salaries, there's little incentive to take big risks with shareholders' money, and the economy remains in a steady growth mode," said Senator Barney Frank, one of the bill's co-sponsors. "But when C.E.O. salaries can fly through the roof, there's a very strong incentive for C.E.O.s

TREASURY ANNOUNCES "TRUE COST" TAX PLAN

By MARCUS S. DRIGGS

The long-awaited "True Cost" plan, which requires product prices to reflect their cost to society, has been signed into law.

Beginning next month, throwaway items like plastic water bottles and other items which are wasteful or damaging to the environment will be heavily taxed, as in many developed countries. Steep taxes will also apply to large cars and gasoline.

The new plan calls for a 200 percent tax on gasoline, comparable to the one long in effect in most European countries. Consumers and commuters are already switching in droves from inefficient gas vehicles to new electric cars. "We suddenly have a waiting list 250 names long for the EV1," said Jake Chiben, the owner of Chiben Chevrolet in

Ex-Secretary Apologizes for W.M.D. Scare

300,000 Troops Never Faced Risk of Instant Obliteration

By FRANK LARIMORE

Ex-Secretary of State Condoleezza Rice reassured soldiers that the Bush Administration had known well before the invasion that Saddam Hussein lacked weapons of mass destruction.

"Now that all of you brave servicemen and women are returning, it's important to us to reassure you, and the American people, that we were certain Hussein had no W.M.D.s and that he would never launch a first strike against the U.S.," Ms. Rice told a group of wounded soldiers at a Veterans' Administration hospital yesterday.

"I want you to know that if we had had the slightest suspicion that Saddam could use W.M.D.s against you, we never would have sent hundreds of thousands of you to be sitting ducks on the Iraqi border for several months."

Mr. Rice was referring to the fact that by August 2002, eight months before the ground invasion, the US had over 100,000 troops stationed in countries throughout the Gulf, a number that grew to over 300,000 shortly before the 2003 attack on Baghdad. Most of them were within range of the Scud missiles used by Mr. Hussein in the 1991 Gulf War, that could easily have been fitted with chemical or biological weapons if they had existed.

Rice noted that in the 1991 Gulf War, Hussein had used missiles to launch attacks on Israel, which made him popular with Arab citizens throughout the Middle East.

"Do you really think we would have given Saddam a major public relations coup by allowing him to annihilate tens of thousands of you right there on holy territory?" asked Ms. Rice.

Former Secretary of State Henry A. Kissinger responded to Ms. Rice's revelation without surprise. "Of course this was the case. When Israel believed Iraq had nuclear weapons in 1981, they didn't attack on the ground — they bombed from the air. That's a preemptive attack. If you believe deterrence will not prevent an attack and that your enemy has W.M.D.s, then the last thing you do is station your troops right next door."

ABC's George Stephanopoulos

Popular Pressure Ushers Recent Progressive Tilt

Study Cites Movements for Massive Shift in DC

By SAMUEL FIELDEN

The spate of reform initiatives undertaken by the Administration and both houses of Congress can be attributed directly to grassroots advocacy, according to a comprehensive study due out this month.

"In education and health care, most notably, but also in housing, banking, and the environment, we have documented unprecedented responsiveness on the part of political leaders," said Dr. Joyce Wellmon, director of the Plains Institute for Policy Analysis, a New York-based think tank. "Our data show a direct correlation between the level of activity of particular coalitions, on the one hand, and specific legislative action, on the other. It's popular pressure that is responsible for the swiftness and scope of legislation emerging from the White House and Congress."

The institute's report shows a three-fold increase in the incidence of letters, phone calls, faxes, and email received by congressional offices, 88 percent of which were from people who identified themselves as new members of particular activist organizations.

See nytimes-se.com for more

The report includes extensive interviews with House and Senate staff, who speak of "unimaginable change," a "dramatic policy shift," and "a new era of accountability" since the elections.

"Not since the Great Depression has the interaction between popular movements and public leaders been so robust," said Jorge Lazaro, head of the U.S. Government Accountability Office. Lazaro cited, in particular, the Wagner Act, also known as the National Labor Relations Act of 1935, which recognized the right of workers to organize and bargain collectively with their employers.

"Roosevelt showed no interest in the Wagner Act until it became clear the unions were going to force it through regardless," Mr. Lazaro noted. "At that point he jumped on it and helped push it into law."

Mr. Lazaro also pointed to the Depression-era organizing of the Farmers' Holiday Association, when farmers refused to sell or bid on crops, blockaded roads, and even once used a torpedo to halt a train carrying livestock into Iowa. Such direct actions helped push courts and legislatures to adopt measures that granted relief from debt caused by low crop prices.

"The similarities between the two periods are remarkable, and the lesson that emerges is simple: if you want change, keep our feet to the fire."

Dr. Wellmon agrees. "The only reason the current President and Congress have been able to implement all these changes was because of pressure from popular movements that made them have to."

The Plains report, due out next month, cites the work of groups associated with United for Peace and Justice, an umbrella for anti-war groups, for galvanizing public support for ending the war, and for pushing the Administration to resist the oil lobby and other interest groups. It also cites the work

Protests organized by Witness Against Torture helped pave the way for the close of the Guantánamo facility.

Nationalized Oil To Fund Climate Change Efforts

By MARION K. HUBBERT

Congress has voted to place ExxonMobil, ChevronTexaco, and other major oil companies under public stewardship, with the bulk of the companies' profits put in a public trust administered by the United Nations, and used for alternative energy research and development in order to solve the global climate crisis.

While unusual, this is not the first time the government has chosen to take control of large corporations. From 1942 to 1944, U.S. car factories were retooled in order to produce tanks for the war effort. And Fannie Mae and Freddie Mac were both created as "government sponsored enterprises" with a significant amount of government oversight.

"We can do what needs to be done," said Senator Charles Schumer, Democrat of New York. "Our planet's survival is at stake. Plus, public pressure hasn't given us much of a choice."

Not everyone felt the move was a good idea. "The climate crisis may or may not be real," declared Senator Kay Bailey Hutchison, Republican of Texas. "I'm an agnostic and I'm staying that way. But sea
