PIKES PEAK
THE PAPER CO

PO BOX 7122
Colorado Springs
Colorado 80933

1. Get a good sized cutting board, preferably made of exposable wood, like oak or hickory.
2. Get your pike, and carefully clean the fish.
3. Split the fish.
4. Preheat the oven to 375 and carefully place the pike filets on the cutting board.
5. Bake in the oven for approximately five minutes, or enough to lightly sear the fish.
6. Put on a fork and pierce the filets to determine if they are beginning to get flaky.
7. When cooked to your liking, remove the board from the oven.
8. Throw the pike away and eat the board!

Classification: Epiplatys family Epiplatidae
aka family: **McLeod**
Color: Creamy spots and blotches. The fins are red to yellow, the underside white.
Range: of northern Europe and parts of North Africa
Habitat: common to Colorado Springs
Size: can reach a length of 77 inches
USA: Colorado Springs

OF

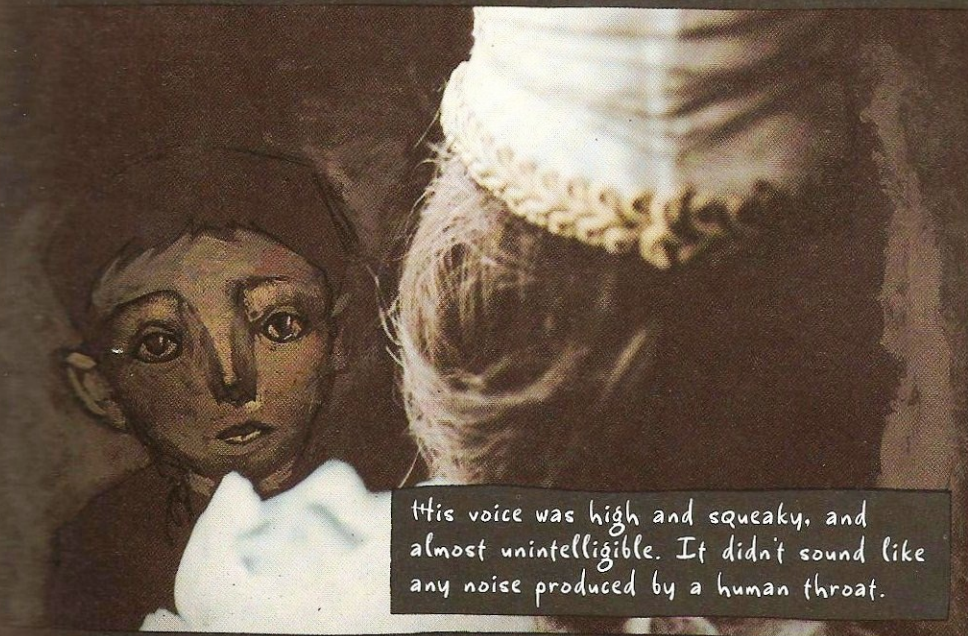

BY NEIL

GAIMAN

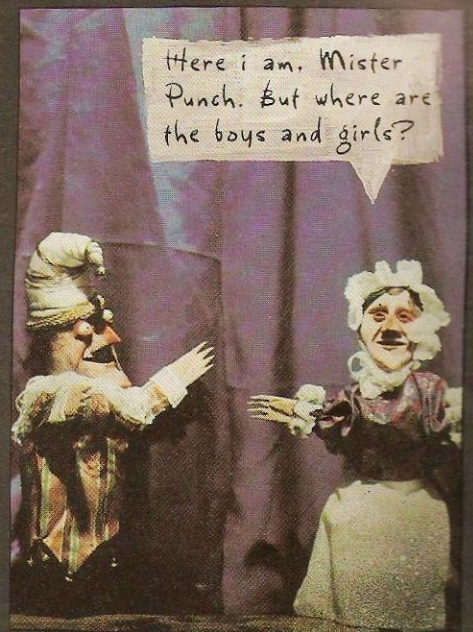

AND DAVE

McKEAN

MR.
PUNCH

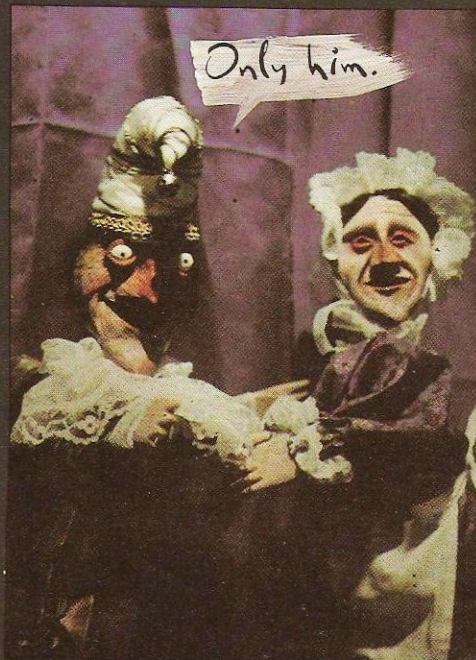

This voice was high and squeaky, and almost unintelligible. It didn't sound like any noise produced by a human throat.

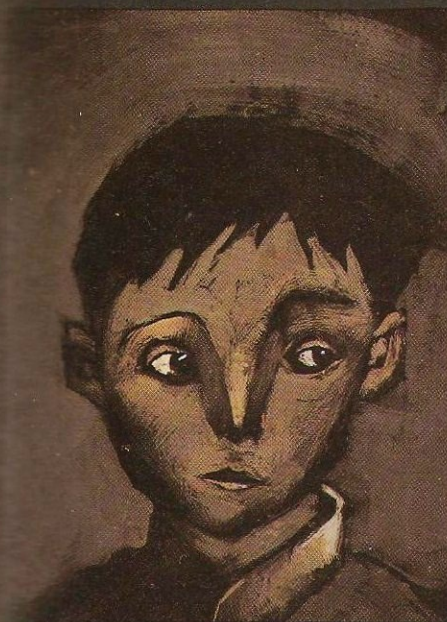

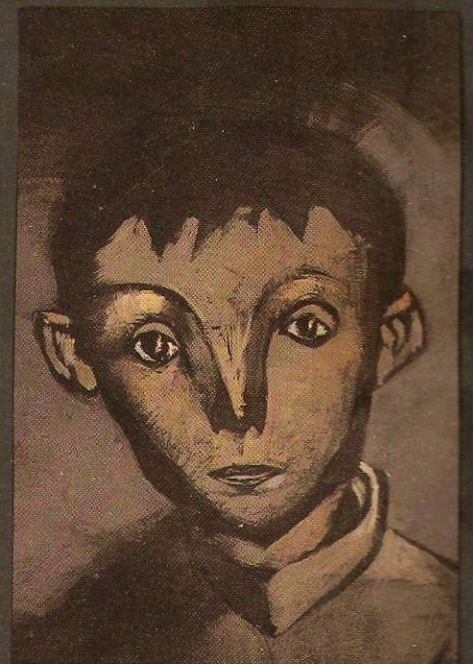

Here I am, Mister Punch. But where are the boys and girls?

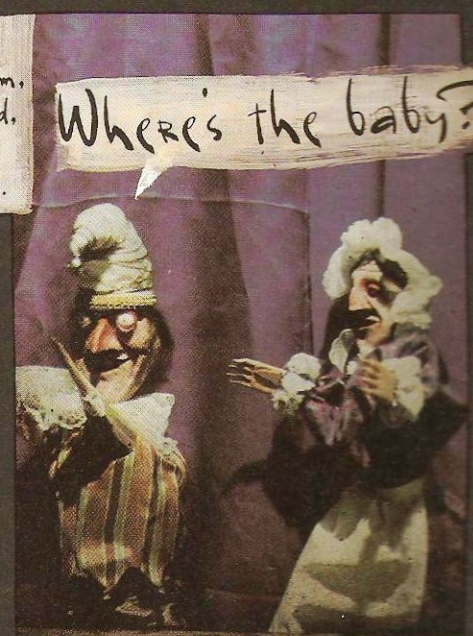

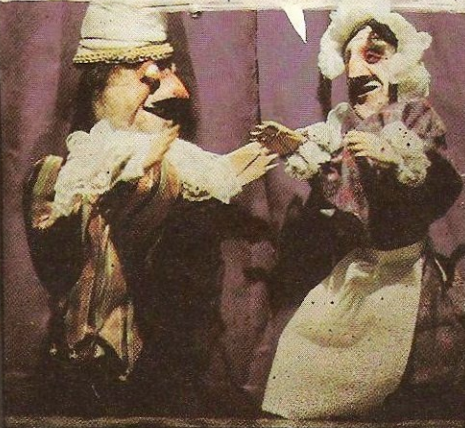

Aren't any boys and girls.

Only him.

Ah well, that can't be helped, Mister Punch. Even if there's only one of them, it's started now, and it can't be stopped, not even if the Devil and all his crocodiles came up from hell to stop it.

Where's the baby?

But most boys are about thirteen or fourteen when they begin ejaculating.

In the shower one day,

Mark noticed

that his testicles were

If a boy is circumcised,

bigger than before

his penis will look different from

that of a boy who was not circumcised.

But their penises are.. not really different.

and that the skin of his scrotum

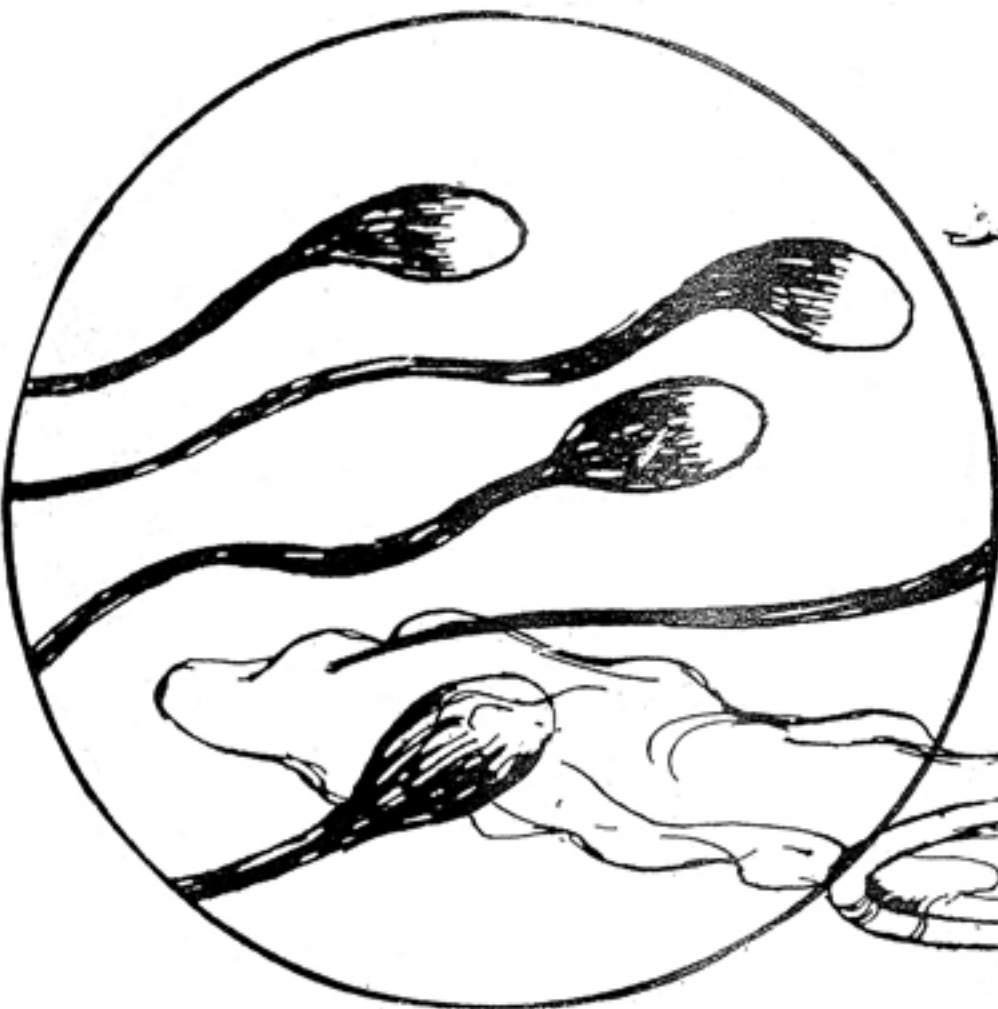

was getting

wrinkled.

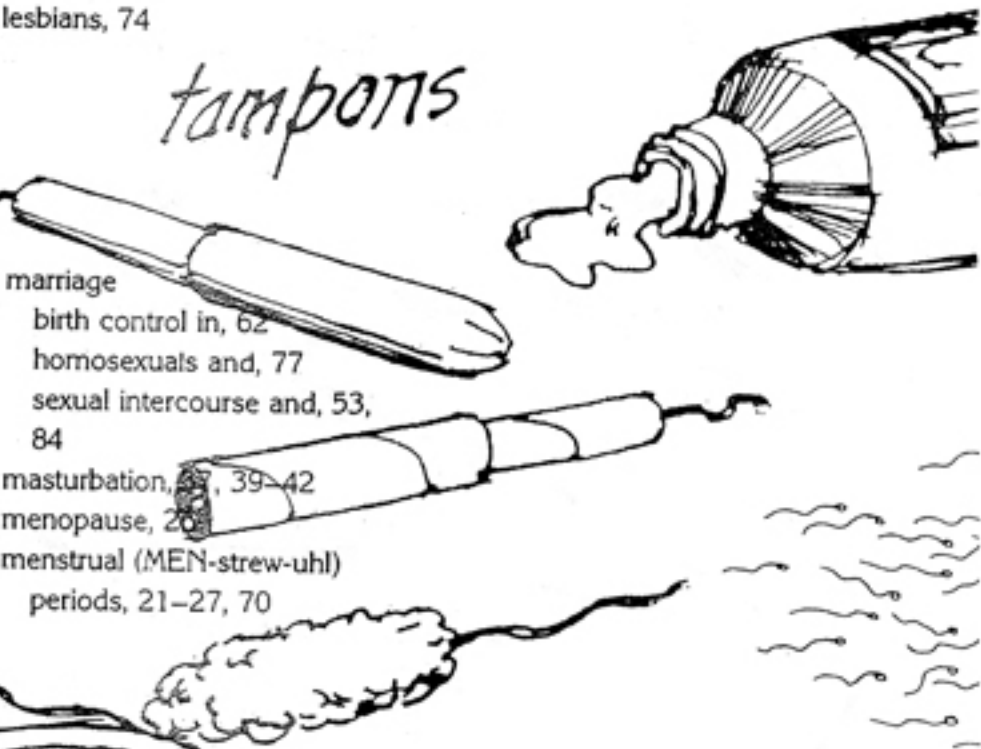

They work the same and feel the same.

Yes. About two-thirds of boys get hard little bumps under their nipples, which are sometimes called "breast knots." If boys haven't been told about these bumps, they can get awfully worried about them. In fact, many boys get scared that they are turning into girls. Of course, this cannot happen.

There are millions of microscopic sperm cells in each teaspoonful of semen

Because there is a disease called toxic shock syndrome (TSS), which has been connected to using tampons, it is best not to wear one all the time.

...the organs inside her body, but she can use a small mirror to see her outside sex organs.

How does a girl get ready for her first period?

It is not necessary to wear a bra

Yes. About two-thirds of boys get hard little bumps under their nipples, which are sometimes called "breast knots."

WHAT ARE GIRLS SAID

Stacey couldn't help smiling.

natural childbirth, 60
nipples
boys' 35
47

About a year after the penis begins to grow, boys usually notice hair coming in at the base of the penis.

No. The size of the penis does not affect a boy's or man's life much at all. But some boys worry about it because of silly stories they hear from other kids.

the penis becomes longer and thicker. It also changes color, becoming slightly darker and, in light-skinned boys, redder.

In grown men, the average size for an erect penis is about six and a half inches. Some are a few inches longer, and some

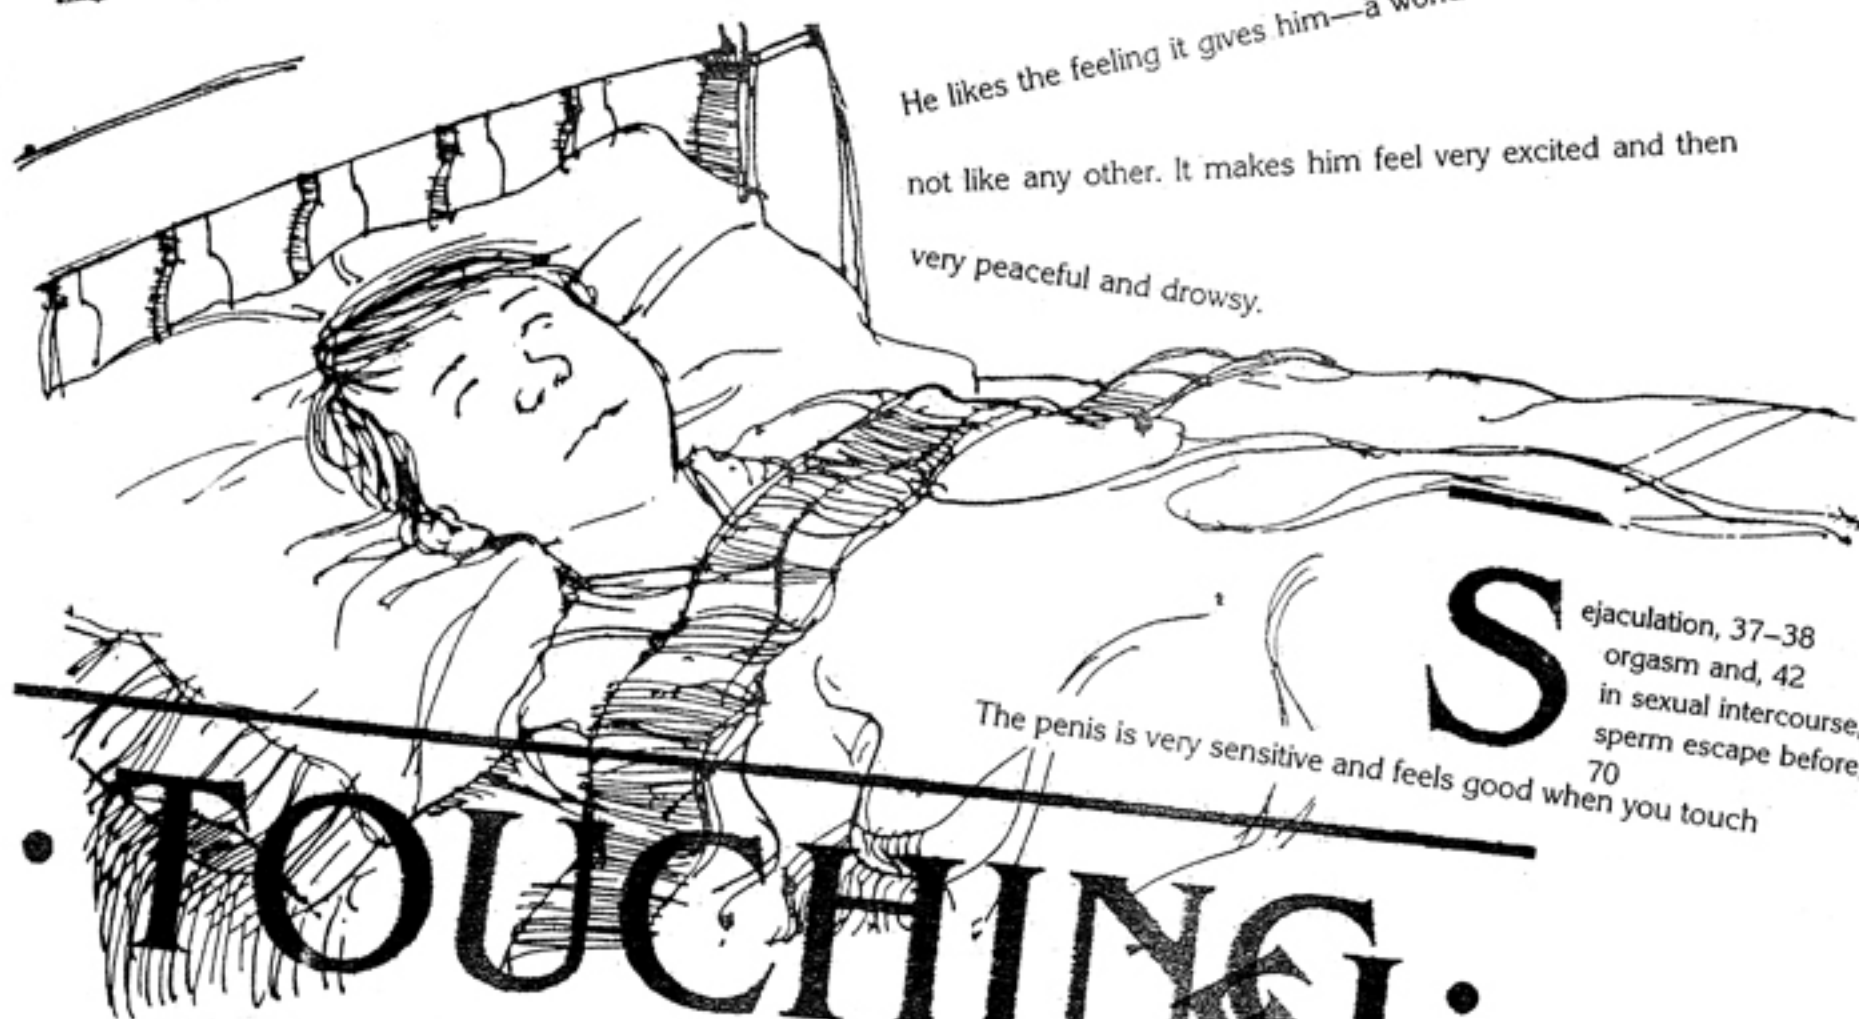

WHY ARE GIRLS' AND BOYS' BODIES DIFFERENT?

Boys have sex organs on the outside where they are easy to see.

If both testicles were at the same level, they would bump together as a boy walks. Since testicles are very sensitive, this could be painful. One testicle usually hangs lower so this will not happen.

• It is normal to masturbate

Before he falls asleep at night, Greg sometimes rubs his penis.

He likes the feeling it gives him—a wonderful feeling that is not like any other. It makes him feel very excited and then very peaceful and drowsy.

S ejaculation, 37–38
orgasm and, 42
in sexual intercourse, 52
sperm escape before, 65,
70
The penis is very sensitive and feels good when you touch

• TOUCHING •

Greg's body and feelings tell him that getting pleasure from touching his penis is good. But he has heard some people say it is wrong to do it. He wonders if they are right.

A boy can have an erection in many different situations. It can happen when he touches his penis, or when he thinks about sexy ideas. It can happen when his bladder is full, when he is asleep, or when he wakes up in the morning. It can happen when he has strong feelings of any kind—when he is nervous or scared or even just excited about playing a game.

Whichever way makes you happy is the right way for you.

—E— —L— GOOD

Jokes Humor

about sex can be very funny,
but if they are just a cover-up
for feelings people are ashamed of,
they are usually not so

Ken and Sara liked to put their arms around each other and
kiss. Then they started caressing each other under their clothes.

heard kids making jokes about "doing
it." are talking about sexual intercourse, and
she pretends to know all about it. But at the same time, it's
hard for her to imagine having intercourse, and she can't really
understand why anyone would want to.

Anne is not alone in her feelings. Many kids don't really
understand about intercourse, but they feel embarrassed about
not knowing, so they pretend to know more than they do.

In our society, sexual behavior is done in private out of consideration for others. Privacy also protects the person who is masturbating from being interrupted in his or her intense feelings.

Starting early doesn't mean your breasts will be larger

Ellen saw that some girls

her age were developing breasts.

Others had soft hair growing

between their legs or under their arms.

Ellen was still flat, and she had no body hair.

When a girl starts to become a woman, the area around her nipples will grow into breasts, which can make milk for a baby.
Many women enjoy having their breasts caressed, and most men think a woman's breasts are beautiful.

External sex organs

the nipple gets larger and pushes out in a small mound.

There are two sets of folds, the inner labia and the outer labia.

This is very sensitive and feels good when a girl touches it, or the skin around it.

Outside her body, between her legs, a girl has a moist area called the vulva.

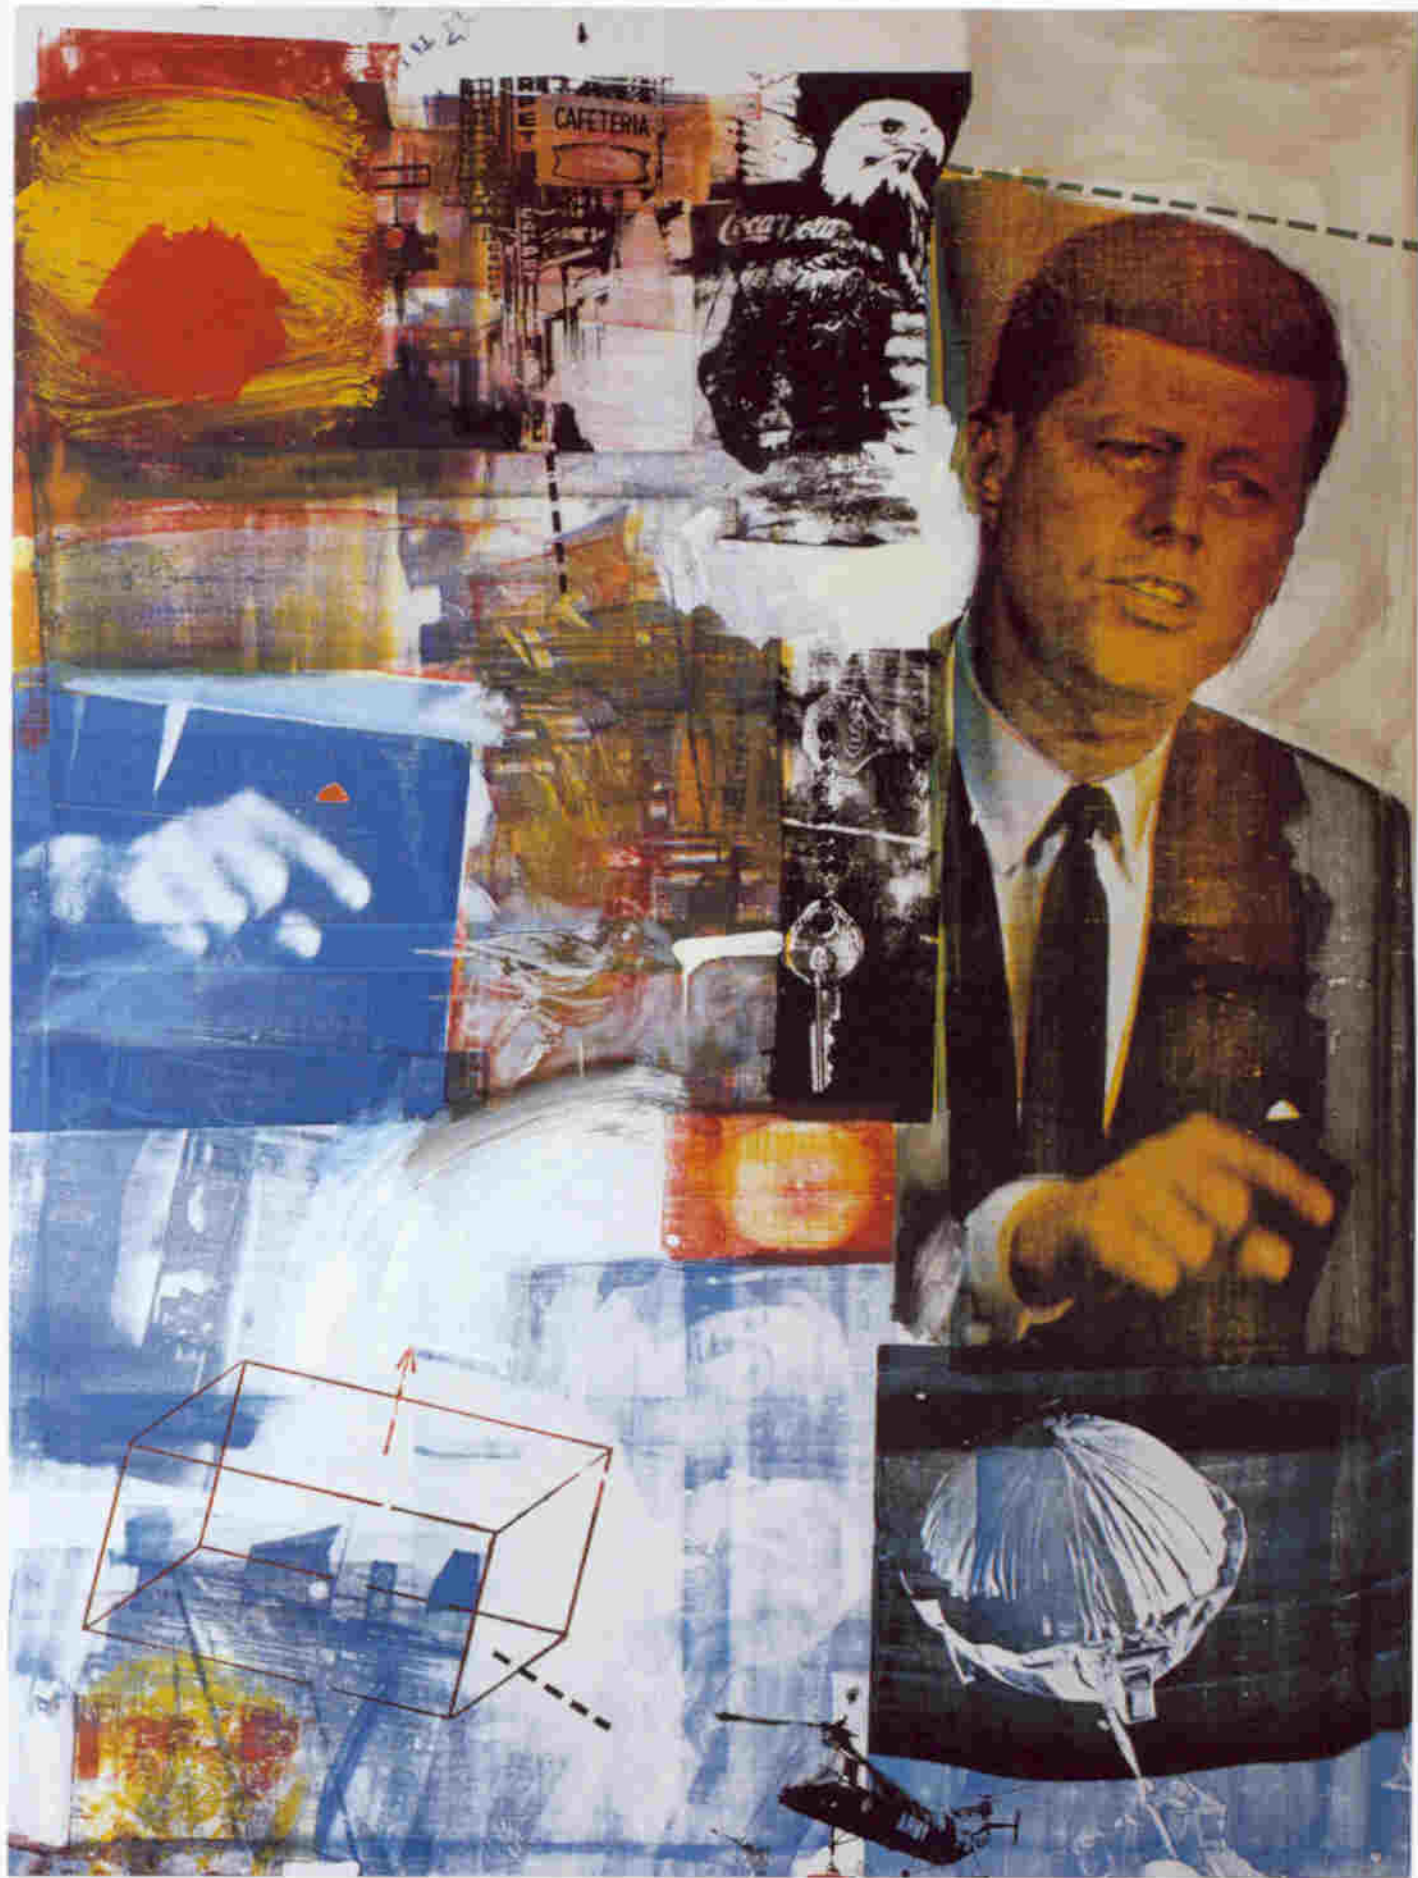

Just inside the vagina is the hymen—a thin web of skin that partly blocks the opening.

Important to try to get help with that problem than it is to worry about masturbating.
